

1-11-25

Read two Integers and perform bitwise operations

Input

```
#include <stdio.h>

int main() {
    int a, b;

    // Read two integers
    printf("Enter first integer: ");
    scanf("%d", &a);

    printf("Enter second integer: ");
    scanf("%d", &b);

    // Perform bitwise operations

    printf("\nBitwise AND (a & b): %d", a & b); printf("\nBitwise OR (a | b): %d", a | b); printf("\nBitwise XOR (a ^ b): %d", a ^ b); printf("\nBitwise NOT (~a): %d", ~a); printf("\nBitwise NOT (~b): %d", ~b); printf("\nLeft Shift (a << 1): %d", a << 1); printf("\nRight Shift (b >> 1): %d\n", b >> 1); return 0;
}
```

Output

```
Enter first integer: 5
Enter second integer: 3
Bitwise AND (a & b): 1
Bitwise OR (a | b): 7
Bitwise XOR (a ^ b): 6
Bitwise NOT (~a): -6
Bitwise NOT (~b): -4
Left Shift (a << 1): 10
Right Shift (b >> 1): 1
```
